ABOUT US

WATPAC CHEMICALS PVT. LTD.

ISO 9001:2015 Certified Company

Watpac Chemicals Pvt. Ltd. is a leading manufacturer and service provider of advanced waterproofing solutions and construction chemicals in India. With years of industry expertise, we are committed to protecting residential, commercial, industrial, and infrastructure projects from water leakage, seepage, dampness, and structural deterioration.

Our innovative waterproofing systems are designed to provide long-lasting protection against harsh weather conditions, ensuring durability, strength, and peace of mind for our customers. We combine high-quality materials, advanced technology, and skilled professionals to deliver reliable waterproofing solutions tailored to every project.

OUR MISSION

To provide innovative, cost-effective, and long-lasting waterproofing solutions that enhance the durability and value of every structure.

OUR VISION

To become India's most trusted waterproofing and construction chemical brand by delivering excellence, quality, and customer satisfaction.

OUR CORE VALUES

QUALITY
We never compromise on quality.

INTEGRITY
We believe in honesty and transparency.

INNOVATION
We adopt advanced technology.

COMMITMENT
We are committed to customer satisfaction.

TERRACE WATERPROOFING

COMPLETE PROTECTION FOR YOUR TERRACE

Watpac®

Stronger Protection.
Lasting **Solutions.**

WATPAC WHITE FLEX

PREMIUM TERRACE WATERPROOFING COATING

Protect your terrace from leakage, seepage, and weather damage with Watpac White Flex. This high-performance waterproofing coating creates a seamless protective layer that prevents water penetration while its white heat-reflective finish helps reduce roof surface temperature.

Ideal for residential, commercial, and industrial buildings, it provides long-lasting protection and enhances the durability of the structure.

KEY BENEFITS

100% WATERPROOF
Prevents leakage and seepage

HEAT REFLECTIVE TECHNOLOGY
Reduces roof temperature

CRACK BRIDGING ABILITY
Covers hairline cracks

UV & WEATHER RESISTANT
Withstands harsh climate conditions

EASY TO APPLY
Smooth application with excellent coverage

SUITABLE FOR

- ✓ Residential Buildings
- ✓ Commercial Buildings
- ✓ Industrial Buildings
- ✓ Apartments
- ✓ Independent Houses
- ✓ Terraces & Roof Tops

APPLICATION PROCESS

1 SURFACE CLEANING
Remove dust, dirt, loose particles and ensure dry surface

2 CRACK REPAIR
Fill cracks and gaps with Watpac crack filler

3 PRIMER APPLICATION
Apply Watpac primer for better adhesion

4 WHITE FLEX COATING
Apply first coat of Watpac White Flex evenly

5 SECOND COAT
Apply second coat after drying for maximum protection

ROOF WATERPROOFING

COMPLETE PROTECTION FOR YOUR ROOF

Watpac®

Stronger Protection.
Lasting **Solutions.**

WATPAC BLACK FLEX

PREMIUM PETROLEUM-BASED ROOF WATERPROOFING

Protect your building from water leakage, dampness, and weather damage with Watpac's advanced roof waterproofing systems. Our waterproofing solutions create a seamless protective barrier that prevents water penetration and extends the life of the roof. We use high-performance products such as Watpac Black Flex, a petroleum-based coating with 1500%+ elongation and 1mm thick flexible membrane, ensuring excellent crack-bridging and long-lasting protection.

Suitable for residential, commercial, and industrial buildings, our waterproofing services deliver durability, flexibility, and reliable performance in all weather conditions.

PETROLEUM-BASED TECHNOLOGY

- ✓ Superior Flexibility
- ✓ Excellent Adhesion
- ✓ High Durability
- ✓ Long Service Life
- ✓ Resistant to Water, UV & Weather

KEY BENEFITS

100% WATERPROOF

Prevents leakage and seepage

1500%+ ELONGATION

High flexibility accommodates structural movement

1 MM THICK FLEXIBLE MEMBRANE

Creates seamless protective layer

UV & WEATHER RESISTANT

Withstands harsh climate conditions

EASY TO APPLY

Smooth application with excellent coverage

SUITABLE FOR

- ✓ Residential Buildings
- ✓ Commercial Buildings
- ✓ Industrial Buildings
- ✓ Warehouses
- ✓ Factories
- ✓ Terraces & Roof Tops
- ✓ Metal & RCC Roofs

APPLICATION PROCESS

SURFACE CLEANING
Remove dust, dirt, loose particles and ensure dry surface

PRIMER APPLICATION
Apply Watpac primer for better adhesion and strength

BLACK FLEX FIRST COAT
Apply first coat of Watpac Black Flex evenly

BLACK FLEX SECOND COAT
Apply second coat after drying for maximum protection

FINISHED SURFACE
Seamless, strong and durable waterproofing protection

WATPAC BLACK FLEX

- ✓ Petroleum-Based Waterproofing Coating
- ✓ 1500%+ Elongation

TOILET WATERPROOFING

COMPLETE PROTECTION FOR YOUR TOILET

100%
WATERPROOF
PROTECTION

Watpac®

Stronger Protection.
Lasting **Solutions.**

WATPAC TOILET SEAL

PREMIUM TOILET WATERPROOFING SYSTEM

Toilets are constantly exposed to water, moisture, and cleaning chemicals, which can cause leakage, seepage, and damage to the structure. Watpac Toilet Seal is a high-performance, cementitious polymer-based waterproofing coating that creates a seamless, flexible, and durable barrier to stop water penetration in toilets.

It bonds strongly with the surface, resists water pressure, and provides long-lasting protection in wet areas.

IDEAL FOR:

Indian & Western
Toilets

Bathrooms

Residential &
Commercial
Buildings

Hotels &
Institutions

KEY BENEFITS

100% WATERPROOF

Prevents leakage, seepage & dampness

STRONG ADHESION

Excellent bonding to tiles, concrete & masonry surfaces

WATER PRESSURE RESISTANT

Withstands constant water exposure

FLEXIBLE & DURABLE

Accommodates minor movement & vibrations

MOLD & MILDEW RESISTANT

Keeps toilet hygienic and odour free

EASY TO APPLY

Brush or roller application, convenient & easy

SUITABLE FOR

- ✓ Toilet Floors & Walls
- ✓ Floor-Wall Joints
- ✓ Around Pipe Penetrations
- ✓ Wash Basin Areas
- ✓ WC Base & Surrounding Areas
- ✓ Indian & Western Toilets

APPLICATION PROCESS

1

SURFACE CLEANING

Remove dust, dirt, loose particles and ensure dry surface

2

PRIMER APPLICATION

Apply Watpac Primer for better adhesion and performance

3

TOILET SEAL FIRST COAT

Apply first coat of Watpac Toilet Seal evenly

4

TOILET SEAL SECOND COAT

Apply second coat after drying for maximum protection

5

WATPAC RUBBER SHIELD – APPLICATION METHODS

Watpac Rubber Shield can be applied using 4 different methods, depending on your requirement and finish:

1 DIRECT COATING

Apply double coat of Watpac Rubber Shield

2 FAV SHINER + WATPAC RUBBER SHIELD

- ✓ Mix your favourite shiner with Watpac Rubber Shield
- ✓ Apply evenly on the surface
- ✓ After the final coat, apply 1 coat of your preferred brand paint for enhanced look

3 WHITE CEMENT + WATPAC RUBBER SHIELD

- ✓ Mix 1 kg White Cement with 5 litres of Watpac Rubber Shield
- ✓ Apply

4 PRIMER + WATPAC RUBBER SHIELD

- ✓ Mix primer with Watpac Rubber Shield
- ✓ It's 50% + 50% method

HIGH ELASTICITY – LONG LASTING PROTECTION

Watpac Rubber Shield forms a highly elastic membrane that stretches with the surface and does not crack even with movement and weather changes.

Watpac®

Stronger Protection.
Lasting **Solutions.**

WATPAC RUBBER SHIELD

PREMIUM TRANSPARENT WATERPROOF COATING

Watpac Rubber Shield is a high-performance, transparent waterproof coating that provides a strong, flexible and seamless protection for exterior walls.

It forms a clear rubber-like membrane that seals the surface, prevents water penetration, resists cracks and peeling, and enhances the life of the structure.

Watpac Rubber Shield is transparent and can be applied directly on the wall. You can also mix your favourite colour with it before applying.

KEY BENEFITS

100% WATERPROOF
Prevents leakage & seepage

TRANSPARENT FINISH
Maintains natural look of the surface

FLEXIBLE & ELASTIC
Adapts to surface movement

CRACK BRIDGING
Prevents hairline cracks

UV & WEATHER RESISTANT
Withstands harsh climate

WATPAC PAINT ADMIXTURE

WATERPROOFING SOLUTION FOR INTERIOR PAINT

Watpac Paint Admixture is a special additive that provides waterproofing protection to interior walls along with your regular paint.

It forms a flexible, invisible barrier that prevents water seepage, dampness, peeling, and blistering, while enhancing the life of your paint.

It also reduces paint cost.

Instead of using 20 litres of paint in a place, you can purchase 10 litres of paint and mix it with 10 litres of WATPAC Paint Admixture and apply it.

With the same painting cost, you get both paint protection and waterproofing solution.

WATER TANK WATERPROOFING

WATPAC RUBBER SHIELD

FLEXIBLE CEMENTITIOUS WATERPROOFING MEMBRANE

Watpac®

Stronger Protection.
Lasting **Solutions.**

COMPLETE
TANK
PROTECTION

WATPAC RUBBER SHIELD

FLEXIBLE CEMENTITIOUS WATERPROOFING MEMBRANE

Watpac Rubber Shield is a two-component, polymer modified waterproofing system designed to provide a seamless, flexible and durable barrier for water tanks.

It effectively protects concrete surfaces from water leakage, seepage, and dampness, ensuring long lasting performance even under constant water pressure.

Ideal for overhead tanks, underground tanks, reservoirs, sumps and water retaining structures.

Strong. Flexible. 100% Waterproof.
Complete Protection for your Water Tank.

COMPLETE WATER TANK PROTECTION

EASY APPLICATION – 3 SIMPLE STEPS

1 SURFACE PREPARATION

Remove all loose material, old cement slurry, dust, algae, oil, or any contaminants. Clean the surface thoroughly and moisten with water.

2 MIXING

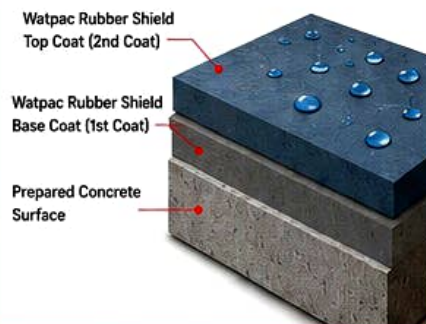

Mix Watpac Rubber Shield Part A (Liquid) with Watpac Rubber Shield Part B (Powder) (Cement) in the recommended ratio. Mix well to a smooth, lump-free consistency.

3 APPLICATION (2 COATS)

Apply first coat evenly using a brush or roller. Allow it to dry for 4-6 hours. Apply second coat in perpendicular direction for best results.

WATERPROOF MEMBRANE

KEY BENEFITS

100% WATERPROOF
Prevents leakage and seepage under water pressure

STRONG ADHESION
Binds strongly with concrete for long lasting protection

FLEXIBLE
Bridges hairline cracks and adapts to surface movement

DURABLE
Resistant to water, chemicals, and weathering for long life

SUITABLE FOR

- ✓ Overhead Water Tanks
- ✓ Underground Water Tanks
- ✓ Water Reservoirs
- ✓ Sumps & Basements
- ✓ Water Retaining Structures

STRONGER PROTECTION. LASTING SOLUTIONS.

CRACK FILLING & INJECTION GROUTING ON TERRACE

PERMANENT REPAIR. LONG LASTING PROTECTION.

Stop Leakage • Strengthen Structure • Extend Life of Concrete

Watpac®

Stronger Protection. Lasting Solutions.

KEY BENEFITS

- Stops Water Leakage Permanently
- Penetrates Deep Into Cracks
- Strengthens Concrete Structure
- High Bond Strength & Durability
- Shrink Free & Non-Shrink
- Suitable for Wet & Dry Conditions
- Cost Effective & Long Lasting

COMPLETE SOLUTION FOR CRACK REPAIR

For Surface Cracks
(Non-Structural)

For Deep Cracks & Structural Voids

EASY APPLICATION – CRACK FILLING (FOR SURFACE CRACKS)

1 IDENTIFY & MARK CRACKS

- Identify all visible cracks and mark them.

2 CLEAN THE CRACK

- Clean the crack properly.
- Remove dust, loose particles, oil, grease and contaminants.

3 APPLY CRACK FILLER

- Apply Watpac Crack Filler using putty knife or trowel.
- Fill the crack completely.

4 LEVEL & SMOOTH FINISH

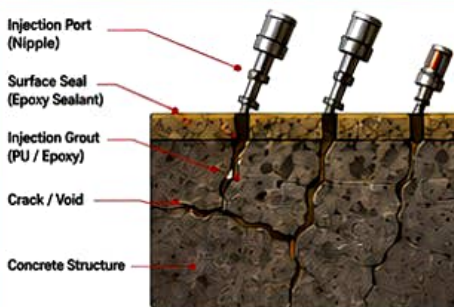

- Level the surface.
- Ensure proper bonding and smooth finish.

5 ALLOW TO CURE

- Allow proper curing.
- Ready for coating / waterproofing.

INJECTION GROUTING PROCESS

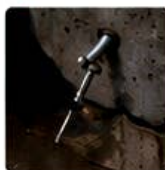

INJECTION GROUTING – STEP BY STEP (FOR DEEP CRACKS & VOIDS)

1 DRILL HOLES

- Drill holes along the crack at an angle (10-15 cm spacing).

2 FIX INJECTION PORTS

- Clean the holes and fix injection nipples using epoxy sealant.

3 SEAL THE SURFACE

- Seal the surface and crack with epoxy sealant leaving ports exposed.

4 INJECT GROUT

- Inject Watpac Injection Grout using pump until grout flows from next port.

5 COMPLETE & CURE

- Close the ports with epoxy sealant.
- Allow curing.
- Crack is permanently sealed and waterproof.

PREVENTS LEAKAGE • STRENGTHENS STRUCTURE • INCREASES DURABILITY

IDEAL FOR

- Terrace & Roof Slabs
- Balconies & Sun Shades
- Water Tanks
- Podiums & Parking Areas
- Basements & Foundations
- Retaining Walls
- Bathroom & Toilets
- All Concrete Structures

APPLICATION PROCESS – 6 SIMPLE STEPS

1 SURFACE PREPARATION

Prepare the floor by cleaning thoroughly. Remove dust, oil, grease and loose particles to ensure strong adhesion.

2 PRIMER APPLICATION

Apply epoxy primer to penetrate the surface and strengthen the bonding with the substrate.

3 BASE COAT APPLICATION

Apply epoxy base coat uniformly to create a strong, level and seamless surface.

4 MIDDLE COAT (IF REQUIRED)

Apply middle coat for additional thickness and high durability in heavy duty areas.

5 TOP COAT APPLICATION

Apply top coat to achieve chemical resistance, smooth finish and enhanced performance.

6 CURING & FINAL FINISH

Allow proper curing time to get a hard, durable and long-lasting seamless finish.

BEFORE & AFTER

BEFORE

AFTER

PERFORMANCE BENEFITS

Chemical Resistant
Resists acids, alkalis, oils, solvents and chemicals.

High Load Bearing
Withstands heavy loads, impact and continuous operations.

Dust Free & Hygienic
Seamless surface prevents dust accumulation and bacterial growth.

Wear & Abrasion Resistant
Provides excellent resistance against wear, tear and mechanical damage.

Long Lasting Durability
Maintains performance and appearance for years with minimal maintenance.

IDEAL APPLICATION AREAS

- ✓ Pharmaceutical & Biotechnology Industries
- ✓ Food & Beverage Processing Units
- ✓ Warehouses & Logistics Centers
- ✓ Automotive Service Centers
- ✓ Manufacturing & Production Units
- ✓ Commercial Buildings & Showrooms
- ✓ Laboratories & Clean Rooms

EASY APPLICATION – 6 SIMPLE STEPS

1 PREPARATION

Clean the surface thoroughly to ensure it is dry and free of dust before applying the first chemical layer.

2 COAT 1 (LAMINATION)

Apply the initial lamination coat to penetrate pores and create a structural waterproof "skin".

3 DRYING PHASE

Allow a strict 24-hour gap to let the first layer cure completely before proceeding further.

4 COAT 2 (MATTE FINISH)

Apply the second coat to provide a smooth, matte protective barrier that reinforces the base.

5 SECOND DRYING PHASE

Wait another 24 hours to ensure the matte layer is fully bonded and stabilized.

6 COAT 3 (GLASS FINISH)

Apply the final glass finishing coat to achieve a high-gloss, UV-resistant, and leak-proof seal.

APPLICATION AREA – KERALA MODEL HOMES

SUITABLE FOR ALL TYPES OF STONE SURFACES

EXTERIOR WALL – APPLIED BY SPRAY

KEY BENEFITS

- ✓ Seamless & Monolithic Waterproof Shield
- ✓ High Gloss, UV Resistant Glass Finish
- ✓ Penetrates Deep & Bonds Strong
- ✓ Excellent Water Repellency
- ✓ Resists Algae, Fungi & Pollution
- ✓ Long Lasting & Durable
- ✓ Suitable for All Climate Conditions

1. IRON SHEET WATERPROOFING

Product Used: Watpac White Flex

BEFORE

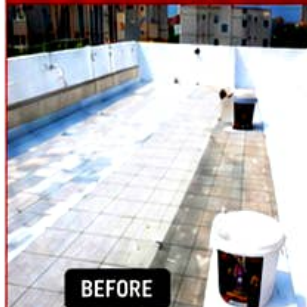

AFTER

- ✓ Prevents leakage through metal sheets
- ✓ Protects against rust and corrosion
- ✓ Heat-reflective & reduces temperature
- ✓ Long lasting weather protection

2. TERRACE WATERPROOFING

Product Used: Watpac White Flex

BEFORE

AFTER

- ✓ Complete waterproof barrier
- ✓ Prevents seepage and leakage
- ✓ UV and weather resistant
- ✓ Suitable for residential & commercial terraces

3. ROOF WATERPROOFING

Product Used: Watpac Black Flex

1. CLEAN THE SURFACE

2. MIX WATPAC BLACK FLEX WITH CEMENT

3. APPLY FIRST COAT

4. APPLY SECOND COAT

- ✓ Petroleum-based waterproofing technology
- ✓ 1500%+ Elongation
- ✓ Flexible waterproof membrane
- ✓ Long-term roof protection

4. EXTERIOR WALL WATERPROOFING

Product Used: Watpac Rubber Shield

BEFORE

AFTER

- ✓ Transparent waterproof coating
- ✓ Can be mixed with any colour
- ✓ UV resistant protection
- ✓ High elasticity & durability

5. INTERIOR WATERPROOFING

(USING WATPAC PAINT ADMIXTURE)

BEFORE

AFTER

- ✓ Waterproofing + Paint protection
- ✓ Reduces paint consumption cost
- ✓ Prevents dampness and peeling
- ✓ No additional labour cost

6. IRON SHEET WATERPROOFING

Product Used: Watpac Bitu Layer Pro

BEFORE

AFTER

- ✓ Bitumen-based black paste coating
- ✓ Resistant to negative water pressure
- ✓ Strong adhesion to concrete
- ✓ Ideal for below-ground structures
